PROFILE

Passionate Frontend Developer specializes in JavaScript and Reactjs. I have a strong dedication to building interactive and user-friendly web applications. I constantly update my skills to stay connect with industry trends and best practices.

SKILLS

- Web Design
- Strong knowledge of HTML, CSS, JavaScript, jQuery, ReactJs and Redux
- Familiarity with responsive web design
- Familiar With Bootstrap and Material UI and Tailwind CSS framework
- Knowledge of version control using Git

PROJECTS

DASHBOARD

Built a dashboard application built with React.js and Vite. It showcases various UI components and features including bar chart, pie chart, area chart, timeline, table and improved the user experience by incorporating responsive design and creating visually appealing interfaces.

MOVIE APP

The Movie DB is a web application built with React.js. It allows users to browse and search for movies and view movie details.

PERSONAL PORTFOLIO

A web application built with HTML, CSS, and jQuery to showcase my personal projects and skills
